**Our Predictions:**

- Light has the highest frequency score and appears in some way every year
- Semiconductors appeared twice in the last three years having not appeared previously, may appear as a whole/part question this year
- Repetition of topics such as Applied Electricity/Particle Physics/Electrostatics/Temperature in short questions seem sure to continue
- Electromagnetism has had a strong presence in both long and short questions in the past five years, indicating a presence for this year's paper
